Table of Contents

CHAPTER 1

Workbook Activities

Workbook Activities: Day Trading A-Z Academy

CHAPTER 2

Activity 1: Define the System

In your own words, answer:

1. What is day trading?
2. Why is day trading more than buying and selling?
3. Why does uncertainty matter in markets?

CHAPTER 3

Activity 2: Vocabulary Builder

Match each word to its meaning.

1. Asset
2. Market
3. Volatility
4. Liquidity
5. Strategy
6. Risk Management
7. Probability

Definitions:

A. A planned method for making decisions.
B. Understanding possible outcomes and their likelihood.
C. Something that has value.
D. How easily something can be bought or sold.
E. A system where buyers and sellers exchange value.
F. Protecting resources by planning for uncertainty.
G. How much and how quickly prices move.

CHAPTER 4

Activity 3: The QRU Trading Intelligence Model

Fill in the missing steps:

Knowledge ? ? Decision ? ? Reflection

Then write one sentence explaining each step.

CHAPTER 5

Activity 4: Risk Thinking Worksheet

Before studying any trade idea, answer:

1. What is the reason?
2. What evidence supports it?
3. What risk exists?
4. What can I learn?

CHAPTER 6

Activity 5: Psychology Reflection

Read the scenario:

A trader enters a position without a plan because they are afraid of missing an opportunity.

Answer:

1. What emotion may be influencing the trader?
2. What part of the decision process was ignored?
3. What could the trader do differently next time?

CHAPTER 7

Activity 6: The Pilot Analogy

Complete the comparison.

A pilot cannot control the .
A pilot can control preparation, training, instruments, and response.

A trader cannot control the .
A trader can control education, process, risk, and decisions.

Reflection:

How does this analogy help you understand disciplined decision-making?

CHAPTER 8

Activity 7: Outcome vs. Decision Quality

Answer in writing:

"Is every losing trade a bad decision? Why or why not?"

Use the word uncertainty in your answer.

CHAPTER 9

Activity 8: Teach-Back Challenge

Explain this idea to another person:

"If the market is uncertain, why is a process more valuable than a prediction?"

Your explanation must include:

- One analogy
- Three vocabulary words
- One risk principle

CHAPTER 10

Activity 9: Memory Sentence Practice

Write the memory sentence three times:

Trading is not about controlling the market. It is about controlling the quality of your decisions.

Then explain what it means in your own words.

CHAPTER 11

Activity 10: Personal Learning Reflection

Complete these prompts:

1. One thing I understand better now is...
2. One trading vocabulary word I can explain is...
3. One risk principle I want to remember is...
4. One way emotions can affect decisions is...
5. One question I still have is...

CHAPTER 12

Practice Questions

- Explain day trading in your own words as a decision process, not just buying and selling.
- Name three parts of the QRU Trading Intelligence Model and explain why each one matters.
- Define volatility and liquidity using simple beginner-friendly language.
- Describe why risk management is important when markets are uncertain.
- Use the pilot analogy to explain what a trader can and cannot control.
- List four common reasons traders may lose money.
- Explain why a losing trade is not automatically proof of a bad decision.
- Create a simple trade reflection checklist using the questions: What was the reason? What evidence supported it? What risk existed? What can I learn?

CHAPTER 13

Reflection Questions

- When you think about trading, do you focus more on outcomes or decision quality? Why?
- How might fear of missing an opportunity lead someone to ignore planning and discipline?
- What does the sentence "Trading is not about controlling the market. It is about controlling the quality of your decisions"

mean to you?
- Why might emotional control be just as important as market analysis?
- How can uncertainty make reflection more valuable after a trade or decision?
- What personal habits would help someone become a better decision-maker in uncertain situations?
- How does financial education help a person even if they never become a day trader?
- What is one area of your own decision-making that could improve through a better process?

CHAPTER 14

Quiz

- What is day trading?
- Buying and selling financial instruments within a short time period, often within the same trading day
- A guaranteed way to make money every day
- A system that removes all uncertainty from markets
- A method that requires no planning or education
- Answer: Buying and selling financial instruments within a short time period, often within the same trading day
- What is the main goal of QRU Day Trading A-Z Academy?
- To create gamblers
- To guarantee profits
- To create informed thinkers who understand markets, risk, psychology, decision-making, and improvement
- To teach people that markets can always be predicted

- Answer: To create informed thinkers who understand markets, risk, psychology, decision-making, and improvement
- What does volatility mean?
- How much and how quickly prices move
- How easily something can be bought or sold
- A planned method for making decisions
- A place where buyers and sellers exchange value
- Answer: How much and how quickly prices move
- What does liquidity mean?
- How emotional a trader feels
- How easily something can be bought or sold
- How certain a future price movement is
- How long a trader studies charts
- Answer: How easily something can be bought or sold
- Why is psychology important in trading?
- Because emotions can influence human decisions
- Because charts are always emotionally accurate
- Because psychology guarantees winning trades
- Because traders do not need risk management if they understand emotions
- Answer: Because emotions can influence human decisions
- According to the QRU Trading Intelligence Model, which sequence best represents the decision system?
- Prediction, profit, certainty, outcome, repetition
- Knowledge, analysis, decision, risk, reflection
- Emotion, speed, luck, winning, confidence
- Buying, hoping, waiting, reacting, forgetting
- Answer: Knowledge, analysis, decision, risk, reflection
- Why do traders commonly lose money?

- Because every losing trade is caused by a bad market
- Because markets are always impossible to understand
- Because of lack of education, poor risk management, emotional decisions, or lack of planning
- Because risk management removes all opportunity
- Answer: Because of lack of education, poor risk management, emotional decisions, or lack of planning
- What principle is ignored when a trader enters a position without a plan because they fear missing an opportunity?
- Planning and emotional discipline
- Liquidity only
- Asset ownership only
- Perfect prediction
- Answer: Planning and emotional discipline
