

AI Literacy Survival Mini-Kit

A beginner-friendly guide for families, students, teachers, and creators

Use AI as a tool. You are the thinker.

Gold Standard Marketplace Edition - v2.0

Knowledge First. Excellence Second. Clarity Always. Imagination Where It Matters.

QRU - Quest for Real Understanding - Transform Information into Real Understanding

Welcome to the QRU AI Literacy Survival Mini-Kit

This mini-kit helps beginners understand AI without fear, confusion, or blind trust. It teaches one core principle: AI can assist your thinking, but it should not replace your thinking.

Use this resource with students, families, homeschool groups, community workshops, or beginner-friendly professional training.

QRU Promise: Understanding creates confidence. When people truly understand what they are learning, they make better decisions, ask better questions, and help others grow.

What is inside?

- The 5 C's of AI Literacy poster
- Beginner AI safety checklist
- Prompt planning worksheet
- Family/teacher mini-lesson
- Parent and student discussion guide

- Basic license and use guidance

The 5 C's of AI Literacy

Be AI Smart!

C	Meaning	Practice
Curious	Ask questions about how AI works.	Before using AI, ask: What do I need to understand?
Critical	Check the facts. AI can make mistakes.	Verify important claims before trusting them.
Careful	Protect privacy and share wisely.	Do not paste private, sensitive, or unsafe details.
Considerate	Use AI respectfully and ethically.	Do not use AI to harm, trick, bully, or cheat.
Creative	Use AI to learn, create, and solve problems.	Use AI as a helper, not a replacement for your mind.

Memory sentence: Use AI as a tool. You are the thinker.

AI Safety Checklist

Before you trust or use an AI answer, run it through this quick QRU check.

- Did I ask a clear question?
- Did I keep private information out of the prompt?
- Did the answer sound too confident without proof?
- Do I need to verify facts, dates, numbers, prices, health, legal, or financial information?
- Can I explain the answer in my own words?
- Does this help me learn, or am I letting AI do all the thinking?
- Would I be comfortable with a teacher, parent, client, or leader seeing how I used AI?

QRU Reality Check: AI can be helpful and still be wrong. A useful answer is not automatically a verified answer.

Prompt Planning Worksheet

Use this page before asking AI for help.

Question	Your notes
What am I trying to understand?	
Who is this for?	
What tone or format do I need?	
What facts should AI not guess?	
What should I verify afterward?	
What final output do I need?	

15-Minute Mini-Lesson

Use this with a student, classroom, family, staff team, or community group.

Minute 0-2 - Ask: What do people think AI can do? What do people fear AI can do?

Minute 3-5 - Teach the QRU principle: AI is a tool. You are the thinker.

Minute 6-9 - Review the 5 C's: Curious, Critical, Careful, Considerate, Creative.

Minute 10-12 - Practice: Give AI one question, then identify what should be verified.

Minute 13-15 - Reflection: What is one way AI can help you learn without replacing your thinking?

Teacher note: The goal is not to make learners afraid of AI. The goal is to help them become wise, careful, creative users.

Family and Classroom Discussion Guide

- What is one good use of AI at school or work?
- What is one unsafe or unfair use of AI?
- Why should people check AI answers before repeating them?
- What information should never be shared with AI?
- How can AI help people learn instead of simply giving them answers?

Quick activity: Ask AI a simple question. Then ask learners to find one thing they would verify, one thing they learned, and one better follow-up question.

Continue Your QRU Journey

Congratulations! You have taken an important step toward becoming a more confident, thoughtful, and responsible AI user.

QRU is building an educational ecosystem designed to help people understand the world - not just memorize facts.

AI Literacy: AI Foundations, Prompt Engineering, AI for Students, AI for Teachers, AI for Parents, AI Safety & Verification

QRU Health University: Understanding the Heart, Understanding the Brain, Blood Pressure Decoder, Cholesterol Decoder, Diabetes Decoder, Emergency Awareness Series

Trading Decoder: Chart Language Decoder, Options Decoder, Market Psychology, Risk Management

Bible Understanding: Understanding Genesis, Understanding Proverbs, Understanding the Parables, Great Minds Translation Series

Programming Fundamentals: Programming Foundations, C# Decoder, Python Decoder, AI Programming Fundamentals

QRU - Quest for Real Understanding. Transform Information into Real Understanding.

License and Use Terms

Personal / Family Use: You may print and use this mini-kit for your own household or personal learning.

Classroom Use: One teacher may use this mini-kit with their own students. Do not resell, repackage, or upload the files publicly.

School / Organization License: Schools, nonprofits, training programs, and organizations should request a group or site license before distributing copies across multiple classrooms, teams, or locations.
