Sports Multiplication for Kids: Train Your Brain Like an Athlete

CHAPTER 1

Slide 1 - Hopeful Hook

Your child doesn't hate math.

They may just need a different doorway.

Sports can become that doorway.

CHAPTER 2

Slide 2 - Big Idea

Multiplication is not just memorizing facts.

Multiplication means:

many groups combined.

CHAPTER 3

Slide 3 - Brain Athlete Mindset

Champions train their bodies.

Brain Athletes train their minds.

Learning math is like sports practice:

- Repeat
- Get feedback
- Adjust
- Try again

- Improve

CHAPTER 4

Slide 4 - Sports Example

A basketball player makes 8 free throws each practice.

They practice 5 times.

$8 \times 5 = 40$ free throws

Now the math has a purpose.

CHAPTER 5

Slide 5 - Mistakes Are Training Reps

One missed shot does not mean you are bad at basketball.

One wrong answer does not mean you are bad at math.

Both are training reps.

CHAPTER 6

Slide 6 - Confidence Message

The goal is not perfection.

The goal is helping a child discover:

"I can learn difficult things."

CHAPTER 7

Closing Line

Every brain can train.
