# Sports Intelligence: Train the Mind Like an Athlete Trains the Body

## CHAPTER 1

### The Big Idea

---

QRU Sports Intelligence Lab(TM) turns math learning into an athlete-training experience.

Instead of treating multiplication as isolated memorization, learning connects to:

- Sports
- Strategy
- Practice
- Teamwork
- Decision-making
- Reflection

The learner becomes a Brain Athlete.

## CHAPTER 2

### What Is a Brain Athlete?

---

A Brain Athlete practices thinking the way an athlete practices a sport.

Athletes improve through:

- Repetition
- Feedback

- Adjustment
- Reflection

Learning can follow the same pattern.

The goal is not perfection.

The goal is helping a child discover:

"I can learn difficult things."

### CHAPTER 3

## **Multiplication, Made Understandable**

---

Multiplication means:

Many groups combined.

Example:

A basketball player makes 8 free throws at each practice.

They practice 5 times.

So:

$8 \times 5 = 40$  free throws

Now math is not just a worksheet problem.

It becomes a way to track progress.
