

QRU Factory Command Center Dashboard™

Version 1.0

The Executive Control System for Managing the QRU Understanding Factory™

Document Classification: Enterprise Operations Management System

Asset Type: Command Dashboard / Production Monitoring Architecture

Status: Founder Approved — Initial Framework

Purpose

The QRU Factory Command Center Dashboard™ provides a centralized operating view of all QRU creation activities.

Its purpose is to transform a complex creative ecosystem into a measurable, organized production environment.

The Command Center answers:

- What are we creating?
 - Why are we creating it?
 - Where is it in the process?
 - What quality standards have been achieved?
 - What decisions are required?
-

Founder Principle™

“A factory cannot improve what it cannot see.”

Section 1

Command Center Overview™

The Dashboard manages five core visibility areas:

1. Knowledge Production
 2. Product Development
 3. Quality Control
 4. Agent Performance
 5. Market Delivery
-

Section 2

Master Production Board™

Purpose:

Track every QRU asset from idea to customer.

Each project receives:

Project ID

Example:

QRU-KR-0001

Project Name

Example:

Day Trading A–Z Academy™

Asset Type

Examples:

- Knowledge Record™
 - Book
 - Course
 - Workbook
 - Video
 - Assessment
-

Current Stage

Production stages:

1. Question Intake
 2. Research
 3. Knowledge Record Creation
 4. Verification
 5. Product Blueprint
 6. Content Creation
 7. Design
 8. Gold Standard Review
 9. Publishing
 10. Customer Feedback
-

Status

Possible statuses:

-  Active
-  Review Required
-  Waiting
-  Improvement Cycle

Section 3

Knowledge Asset Tracker™

Tracks:

Knowledge Records™

Information:

- Record ID
 - Topic
 - Source status
 - Verification status
 - Connected products
 - Update history
-

Section 4

Product Manufacturing Tracker™

Tracks products created from Knowledge Records™.

Fields:

Product Name

↓

Source Knowledge Record™

↓

Audience

Format

Production Stage

Design Status

Quality Status

Publishing Status

Section 5

QRU Gold Standard Control Panel™

Every product receives evaluation scores.

Truth Gold™

Status:

Approved / Needs Review

Understanding Gold™

Status:

Approved / Needs Improvement

Application Gold™

Status:

Approved / Needs Improvement

Experience Gold™

Status:

Approved / Needs Improvement

Legacy Gold™

Status:

Approved / Needs Improvement

Section 6

Agent Management Dashboard™

Tracks QRU intelligence contributors.

Each agent record includes:

Agent Name

Example:

Verification Lion™

Mission

Purpose of agent.

Responsibility

Assigned Factory stage.

Output Quality

Measured performance.

Verification Accuracy

Trust measurement.

Improvement History

Learning record.

Section 7

Research Intelligence Tracker™

Tracks:

- Sources reviewed
- Research completed
- Influential references
- Verification notes
- Intellectual lineage

Purpose:

Maintain QRU Research Foundation™.

Section 8

Marketplace Readiness Dashboard™

Before customer release:

Checklist:

- ☐ Product complete
 - ☐ Design approved
 - ☐ Quality approved
 - ☐ Metadata completed
 - ☐ Pricing reviewed
 - ☐ Customer pathway created
 - ☐ Marketing assets prepared
-

Section 9

Customer Intelligence Loop™

After release:

Track:

- Reviews
- Questions
- Improvements
- Usage feedback
- New opportunities

Output:

Factory Improvement Data™

Section 10

Executive Decision Panel™

Weekly founder review questions:

Production

What is moving?

What is blocked?

Quality

Does anything fail the Treasure Standard™?

Opportunity

What knowledge gaps exist?

Improvement

What should the Factory do better?

Section 11

QRU Factory Metrics™

Creation Metrics

Number of:

- Knowledge Records™
 - Products
 - Learning experiences
-

Quality Metrics

- Verification rate
 - Gold Standard approval rate
 - Revision rate
-

Impact Metrics

- Customer satisfaction
 - Learning outcomes
 - Usage
-

Growth Metrics

- Market response
 - Product performance
 - Knowledge expansion
-

Section 12

Factory Operating Rhythm™

Daily

Review:

- Active tasks
 - Blockers
 - Production movement
-

Weekly

Review:

- Dashboard
 - Quality gates
 - Priorities
-

Monthly

Review:

- Product performance
- Knowledge expansion
- System improvements

Quarterly

Review:

- Architecture
 - Strategy
 - Innovation opportunities
-

Section 13

Command Center Rule™

The Factory follows:

One source of truth.

One production pathway.

One quality standard.

One improvement loop.

Founder Declaration™

“The Command Center does not control creativity. It protects creativity by creating the visibility needed for excellence.”

Next Recommended Artifact

QRU Factory Agent Governance Manual™ v1.0

Purpose:

Define exactly:

- How agents are created
- How agents are trained
- How agents are evaluated
- What authority agents have
- How verification works
- How human oversight is maintained

This strengthens the AI governance layer and protects the Factory from uncontrolled intelligence expansion.
