QRU Factory Acceptance Test - Understanding Sleep and Rest - Short Video

Manufactured by QRU Factory(TM). QRU simplifies the path to understanding the truth.

Short Video Production Script

QRU Factory Acceptance Test - Understanding Sleep and Rest

Topic: Why humans need sleep - and why rest cannot fully replace it

Length: ~90 seconds

Style: Warm, clear, educational, visually clean

Audience: General public

Core Message: Rest can pause the drain, but sleep does the repair.

Learning Outcomes

By the end of this short video, viewers should understand:

1. Rest and sleep are both valuable, but they are not the same.
 2. Sleep is an active biological process that supports brain, body, mood, and safety.
 3. Most adults need at least 7 hours of sleep, while needs vary by age and individual.
 4. Simple sleep habits can support healthier sleep.
 5. Persistent insomnia, excessive daytime sleepiness, loud snoring, gasping, or suspected sleep apnea should be discussed with a healthcare professional.
 6. This video is educational and is not a substitute for medical advice.
-

Scene-by-Scene Production Script

| Scene | Time | Narration | Visuals | On-Screen Text |

|---|---:|---|---|---

| 1. QRU Opening Hook | 0:00-0:07 | "From QRU: Have you ever rested all day? but still felt exhausted?" | Clean QRU-branded opening. Cut to a tired person sitting on a couch with a blanket, phone nearby, rubbing their eyes. | Can rest replace sleep? |

| 2. The Simple Answer | 0:07-0:16 | "Rest helps. But sleep is different. Sleep is not just doing nothing - it is active biological maintenance." | Smooth transition to a calm animation of a sleeping person. Icons appear: brain, heart, shield, muscles. | Sleep = active maintenance |

| 3. What Sleep Supports | 0:16-0:29 | "During good-quality sleep, your body supports brain function, immune regulation, heart health, metabolism, emotional balance, and physical recovery." | Animated body outline with highlighted systems: brain glow, immune shield, steady heart rhythm, muscles recovering. | Brain ? Immunity ? Heart ? Metabolism ? Mood ? Recovery

|

| 4. How Much Sleep Do We Need? | 0:29-0:39 | "Sleep needs vary by age and by person. Most adults need at least 7 hours each night. Children and teenagers usually need more." | Split-screen: adult sleeping with "7+ hours"; child and teen sleeping with "usually more." | Most adults: 7+ hours
Children & teens: usually more |

| 5. Rest vs. Sleep Analogy | 0:39-0:51 | "Think of your body like a car. Rest is like parking so the engine can cool down. Sleep is like taking it into the shop for essential checks and repairs." | A car parks and the engine cools. Then it shifts into a clean repair shop where systems are checked. | Rest pauses the drain.
Sleep does the repair. |

| 6. Real-World Impact | 0:51-1:02 | "When someone gets too little sleep, they may feel irritable, crave more high-calorie foods, struggle to focus, and react more slowly." | Calm quick cuts: frustration over a small delay, reaching for snacks, losing focus at a laptop. Driving simulator shows a delayed brake response at a red light - no crash or danger. | Too little sleep can affect mood, appetite, focus, and reaction time. |

| 7. Practical Sleep Habits | 1:02-1:17 | "To support better sleep, try a consistent sleep and wake time. Reduce bright screens before bed. Keep the room cool, dark, and quiet. Limit caffeine late in the day, and build a relaxing wind-down routine." | Evening routine: bedtime reminder, phone placed away, dim lights, caffeine cup crossed out in the evening, cool dark bedroom, reading or gentle stretching. | Try tonight:
Same sleep/wake time
Less bright screens
Cool ? Dark ? Quiet
Limit late caffeine
Wind down |

| 8. When to Get Help | 1:17-1:27 | "If you have persistent insomnia, excessive daytime sleepiness, loud snoring, gasping, or suspected sleep apnea, talk with a healthcare professional." | Person calmly speaking with a clinician. Supportive, non-alarming tone. | Persistent sleep concerns?
Talk with a healthcare professional. |

| 9. Educational Disclaimer | 1:27-1:34 | "This video is educational and is not a substitute for medical advice, diagnosis, or treatment." | Simple QRU-branded information card with calm background. | Educational only
Not medical advice |

| 10. Closing Summary | 1:34-1:30 | "Remember: rest can pause the drain, but sleep does the repair." | Return to peaceful sleeping person. QRU closing logo fades in. | Rest pauses the drain.
Sleep does the repair. |

\Production note: Final edit should tighten Scenes 9-10 so the completed runtime lands at approximately 90 seconds. Recommended final timestamp structure: Scene 9 from 1:27-1:30 with disclaimer displayed visually, while the closing line appears as the final caption and voiceover tag.

Final Runtime Timing Plan

Segment Time
--- ---:
Opening + Hook 0:00-0:07
Sleep vs. Rest Explanation 0:07-0:16
Sleep Functions 0:16-0:29
Sleep Duration Guidance 0:29-0:39
Car Analogy 0:39-0:51
Real-World Impact 0:51-1:02
Practical Sleep Habits 1:02-1:17
Healthcare Guidance 1:17-1:27
Disclaimer + Closing Summary 1:27-1:30
Total ~90 seconds

Accessibility and Production Requirements

- Captions: Include accurate closed captions for all narration.
- Readable text: Use high-contrast text, large font, and uncluttered backgrounds.
- Pacing: Narration should be calm, clear, and audio-friendly, with brief pauses after key ideas.
- Visual safety: Avoid flashing visuals, strobe effects, or rapid high-contrast cuts.
- Tone: Supportive and educational; avoid fear-based or shame-based messaging.
- Medical caution: Keep all health guidance non-diagnostic and encourage professional support for persistent or concerning symptoms.
- Branding: Use QRU-branded opening and closing cards with clean, professional styling.
