A QRU Wellness Poster for Adults, Families, Students, and Caregivers

What You'll Learn

After reading this poster, you will be able to:

- Identify how much sleep different age groups generally need.
 - Explain why sleep supports health, learning, mood, and safety.
 - Recognize common signs of poor sleep or inadequate rest.
 - Use simple sleep hygiene habits to improve nightly rest.
 - Know when to seek medical advice for ongoing or concerning sleep problems.
-

? Sleep Is Not "Doing Nothing"

Sleep is an essential body process that helps your brain and body recover, reset, and prepare for the next day.

Quality sleep supports:

- Memory and learning
- Mood and emotional regulation
- Focus, decision-making, and reaction time
- Immune system function
- Growth and development in children and teens
- Heart, metabolism, and overall health
- Safety at school, work, home, and on the road

Key reminder: Rest is not a reward. Rest is part of healthy functioning.

? How Much Sleep Do We Need?

Sleep needs vary by age, health, activity level, schedule, and individual medical needs. These are general daily ranges, including naps for younger children. Some people may need more or less sleep based on medical guidance.

| Age Group | General Recommended Sleep |

|---|---:|

| Newborns, 0-3 months | 14-17 hours |

| Infants, 4-12 months | 12-16 hours |

| Toddlers, 1-2 years | 11-14 hours |

| Preschoolers, 3-5 years | 10-13 hours |

| School-age children, 6-12 years | 9-12 hours |

| Teens, 13-18 years | 8-10 hours |

| Adults, 18-64 years | 7 or more hours |

| Older adults, 65+ years | 7-8 hours |
