Train Your Brain Like an Athlete Trains Their Body(TM)

QRU Sports Intelligence Lab(TM)

CHAPTER 1

Sports Intelligence: Train Your Brain Like an Athlete Trains Their Body(TM)

CHAPTER 2

Slide 1 - The Hope

Every child can grow stronger in how they think.

Just like athletes improve through practice, feedback, adjustment, and reflection, learners can build stronger understanding systems.

QRU Sports Intelligence Lab(TM) begins with a simple belief:

Children do not need more information.

They need stronger understanding systems.

CHAPTER 3

Slide 2 - The Problem

Many children hear math and think:

"I'm bad at math."

QRU offers a different understanding:

"You may need more practice, different explanations, or a different

strategy."

Multiplication is not meant to be:

- Memorizing without understanding
- Racing against others
- Measuring intelligence

Learning should help children discover:

"I can learn difficult things."

CHAPTER 4

Slide 3 - The Vision

QRU Sports Intelligence Lab(TM) turns math learning into an athlete-training experience.

Instead of treating multiplication as isolated memorization, QRU connects mathematics to:

- Sports
- Strategy
- Competition
- Practice
- Teamwork
- Decision-making

The learner becomes a:

Brain Athlete

The goal is not only correct answers.

The goal is developing:

- Confidence
 - Curiosity
 - Persistence
 - Reasoning
 - Communication
 - Self-awareness
-

CHAPTER 5

Slide 4 - What Is Sports Intelligence?

Sports Intelligence is using the patterns, strategy, and practice of sports to build stronger thinking.

Athletes train their bodies through:

- Repetition
- Feedback
- Adjustment
- Reflection

Learners can train their minds in a similar way.

In QRU Sports Intelligence Lab(TM):

Mathematics becomes a mental sport.

CHAPTER 6

Slide 5 - The Core Learning Path

QRU follows the Quest for Real Understanding(TM):

Question

?

Understanding

?

Practice

?

Connection

?

Application

?

Reflection

?

Growth

This pathway helps learning become more than an answer.

It becomes a process of building understanding.

CHAPTER 7

Slide 6 - A Simple Definition

7.1 Multiplication

Multi = many

Plication = groups

7.2 Meaning

Many groups combined.

Multiplication is not just a fact to remember.

It is a way to understand groups, patterns, and totals.

CHAPTER 8

Slide 7 - Sports Makes Math Visible

8.1 Football Example

A quarterback completes 5 passes each quarter.

There are 4 quarters.

$$5 \times 4 = 20 \text{ passes}$$

The child is not only solving a math problem.

The child is seeing how multiplication can describe what happens in a game.

CHAPTER 9

Slide 8 - Basketball Example

A basketball player makes 8 free throws each practice.

The player practices 5 times.

$$8 \times 5 = 40 \text{ free throws}$$

The math becomes part of tracking athletic progress.

The worksheet becomes a real-world situation.

CHAPTER 10

Slide 9 - The Everyday Analogy

Learning math through sports is like watching game film after practice.

You:

- Review what happened
- Notice patterns
- Adjust your strategy
- Come back stronger next time

Reflection becomes part of improvement.

Mistakes become training reps.

CHAPTER 11

Slide 10 - Brain Athlete Thinking

In QRU Sports Intelligence Lab(TM), children learn that:

- The brain can strengthen through meaningful practice
- Mistakes are part of training
- Understanding creates confidence
- Strategy matters
- Practice builds capability

A Brain Athlete does not have to be perfect.

A Brain Athlete learns how to improve.

CHAPTER 12

Slide 11 - The Coach Role

In this model, adults become coaches.

A coach can be a:

- Parent
- Caregiver
- Teacher
- Facilitator
- Encourager
- Guide

The goal is not pressure.

The goal is helping the child discover:

"I can learn difficult things."

CHAPTER 13

Slide 12 - For Parents and Caregivers

QRU Sports Intelligence Lab(TM) helps children improve math skills while making learning feel exciting and connected to things they already love.

Sports can become a doorway into:

- Mathematics
- Confidence
- Problem solving
- Communication
- Persistence
- Lifelong learning

Your child doesn't hate math.

They may just need a different doorway.

CHAPTER 14

Slide 13 - For Educators

QRU Sports Intelligence Lab(TM) is an applied learning framework combining:

- Mathematics instruction
- Cognitive skill development
- Storytelling
- Real-world problem solving

The teacher's role becomes:

- Coach
- Facilitator
- Encourager
- Guide

The classroom becomes a training space for understanding.

CHAPTER 15

Slide 14 - The Science Connection

QRU Sports Intelligence Lab(TM) connects with research areas such as:

- Neuroplasticity
- Retrieval practice
- Spaced repetition
- Growth mindset
- Metacognition
- Cognitive load

The principle is simple:

The human brain strengthens through repeated meaningful practice.

CHAPTER 16

Slide 15 - Intelligence Beyond School

QRU defines intelligence as:

The ability to learn, understand, adapt, and solve problems.

This matters beyond a math lesson.

Sports Intelligence helps develop skills needed in life, including:

- Decision making
- Problem solving
- Confidence

- Adaptability
 - Learning ability
-

CHAPTER 17

Slide 16 - What Children Practice

A Brain Athlete practices more than answers.

They practice:

- Asking questions
- Explaining strategies
- Finding patterns
- Solving problems
- Reflecting on improvement
- Communicating their thinking

This helps math become a system of understanding, not just a list of facts.

CHAPTER 18

Slide 17 - Activities That Build Capability

QRU Sports Intelligence Lab(TM) can include activities such as:

- Design your own sports problem
 - Explain your strategy
 - Create a training plan
 - Reflect on improvement
-

These activities help children connect math to action, strategy, and growth.

CHAPTER 19

Slide 18 - Where It Can Be Used

QRU Sports Intelligence Lab(TM) can be used in:

- Homeschool
- Classrooms
- Family learning
- Coaching programs
- Educational products

The learning experience can meet children where they are and connect to what they already enjoy.

CHAPTER 20

Slide 19 - The Experience

Every Brain Athlete begins as a rookie.

They enter the QRU Sports Intelligence Lab.

They train.

They practice.

They struggle.

They improve.

They discover that champions are not created by talent alone.

Champions are created through intentional practice.

CHAPTER 21

Slide 20 - The Growth Goal

The goal is not to label children.

The goal is to build stronger understanding systems.

The child learns:

- I can practice
- I can improve
- I can understand
- I can solve problems
- I can learn difficult things

That belief can change the way a child approaches learning.

CHAPTER 22

Slide 21 - Memory Sentences(TM)

Champions train their bodies.

Brain Athletes train their minds.

Understanding creates confidence.

Every brain can train.

CHAPTER 23

Slide 22 - Closing Vision

Sports can become a gateway to intelligence.

Math can become a training field.

Practice can become confidence.

Questions can become understanding.

And every learner can begin the journey as a Brain Athlete.
