CHAPTERS

Chapter 1

Workbook Activities

Chapter 2

Activity 1: Define It in Your Own Words

Chapter 3

Activity 2: AI Around Me

Chapter 4

Activity 3: Strengths and Limits

Chapter 5

Activity 4: AI Output Evaluation Checklist

Chapter 6

Activity 5: Scenario Reflection

Chapter 7

Activity 6: Personal AI Literacy Plan

Chapter 8

Practice Questions

Chapter 9

Reflection Questions

Chapter 10

Quiz

CHAPTER 1

Workbook Activities

Workbook Activities: AI Literacy

CHAPTER 2

Activity 1: Define It in Your Own Words

Write a one-sentence definition of AI literacy.

Prompt: AI literacy means...

Now add three things an AI-literate person should be able to do:

- 1.
- 2.
- 3.

CHAPTER 3

Activity 2: AI Around Me

List five places where you may encounter AI in daily life, education, work, media, healthcare, or public services.

For each example, write what the AI might be doing.

Example	What might AI be doing?	What should a user question?
--- --- ---		
1		
2		
3		

| 4 |||

| 5 |||

CHAPTER 4

Activity 3: Strengths and Limits

Choose one AI tool or AI use case.

What can it help with?

What can it not reliably do?

Where would human judgment still be important?

CHAPTER 5

Activity 4: AI Output Evaluation Checklist

Use this checklist to review an AI-generated output.

- Accuracy: What needs to be checked?
- Source quality: What evidence would strengthen the output?
- Bias: Whose perspective might be missing?
- Privacy: Was any sensitive information used or requested?
- Security: Could this create a risk if misused?
- Transparency: Is it clear how or why the output was produced?
- Accountability: Who is responsible for using the result?
- Human oversight: Should a person review this before action is taken?

CHAPTER 6

Activity 5: Scenario Reflection

Scenario: A school, workplace, clinic, or public agency wants to

use an AI system to support decisions.

Answer:

1. What benefits might the system offer?
2. What risks should be considered?
3. What questions should people ask before adopting it?
4. Who should be involved in the decision?
5. How can human oversight be included?

CHAPTER 7

Activity 6: Personal AI Literacy Plan

Choose two skills you want to strengthen.

Skill 1:

Why it matters:

How I will practice:

Skill 2:

Why it matters:

How I will practice:

Closing reflection: The most important thing I want to remember about AI literacy is...

CHAPTER 8

Practice Questions

- In your own words, define AI literacy without using the phrase "artificial intelligence."
- List three places where AI may appear in everyday life, such as education, work, healthcare, media, or public services.

- Choose one AI tool or system you have used or seen. What does it seem to do well, and what should a human still check?
- Explain the difference between an automated output and human judgment.
- Identify two possible risks of using AI-generated information without checking it.
- Create a short checklist someone could use before trusting an AI-generated answer.
- Describe why privacy matters when entering personal information into an AI system.
- Give one example of how bias could affect an AI system's output or decision.
- Explain why transparency and accountability are important when AI is used in schools, workplaces, healthcare, or public services.
- Practice evaluating an AI answer by asking: Is it accurate? Is it biased? Are the sources clear? What might be missing?

CHAPTER 9

Reflection Questions

- Where in your life do you already interact with AI, even if you do not always notice it?
- How confident do you feel in judging whether an AI output is accurate or trustworthy? What would help you improve?
- When should a person rely on AI assistance, and when should they slow down and use stronger human oversight?
- What kinds of personal information would you avoid sharing with an AI system, and why?

- How might AI literacy help people participate more fairly in decisions that affect education, work, healthcare, media, or public services?
- What responsibility do users have when sharing AI-generated content with others?
- How can learning about AI's limitations make someone more powerful rather than more fearful?
- What does responsible AI use look like in your community, school, workplace, or family?

CHAPTER 10

Quiz

- What is AI literacy?
- The ability to understand, evaluate, use, and participate in decisions about AI systems
- The ability to build advanced robots from scratch
- The belief that AI is always more accurate than humans
- The skill of avoiding all technology
- Answer: The ability to understand, evaluate, use, and participate in decisions about AI systems
- Which of the following is part of responsible AI literacy?
- Checking accuracy, bias, privacy risks, and source quality
- Trusting every AI output because it is automated
- Sharing private information freely with any AI tool
- Assuming AI has no social impact
- Answer: Checking accuracy, bias, privacy risks, and source quality
- Why is human oversight important when using AI?

- Because AI outputs can have limitations and should be evaluated by people
- Because AI can never be useful
- Because humans should never use automated tools
- Because AI systems always explain themselves perfectly
- Answer: Because AI outputs can have limitations and should be evaluated by people
- Which statement best reflects strong AI literacy?
- AI can be useful, but its outputs should be checked for accuracy, bias, and context
- AI is always neutral because it uses technology
- AI should make all important decisions without people involved
- AI literacy is only useful for computer scientists
- Answer: AI can be useful, but its outputs should be checked for accuracy, bias, and context
- As AI becomes embedded in education, work, healthcare, media, and public services, broad AI literacy can support:
- Informed participation, safer adoption, and more equitable outcomes
- Less public understanding of technology
- Complete removal of human responsibility
- The end of the need to evaluate information
- Answer: Informed participation, safer adoption, and more equitable outcomes

COLOPHON

AI Literacy - Workbook was set in a classic serif text face chosen for comfortable long-form reading, with display typography in a complementary sans-serif.
