CHAPTERS

Chapter 1

Teacher Notes

Chapter 2

Lesson Plan

Chapter 3

Grade/Level

Chapter 4

Learning Goals

Chapter 5

Essential Question

Chapter 6

Materials

Chapter 7

Lesson Flow

7.1 1. Warm-Up: Where Do We Meet AI? 10 minutes

7.2 2. Mini-Lesson: What Is AI Literacy? 15 minutes

7.3 3. Concept Map: What Should AI-Literate People Know? 15 minutes

7.4 4. Hands-On Evaluation: Check an AI Output 25 minutes

7.5 5. Discussion: Why This Matters 15 minutes

7.6 6. Exit Ticket 5 minutes

Chapter 8

Assessment

Chapter 9

Extension

Chapter 10

Step by Step

Chapter 11

Kingdom Lion Verification Questions(TM)

CHAPTER 1

Teacher Notes

AI literacy should be taught as both a practical skill and a civic responsibility. Help learners understand that AI systems are tools built from data, algorithms, and human design choices-not magic, not neutral by default, and not reliable in every situation. Effective instruction should combine hands-on use with critical evaluation: What is the system being asked to do? What data might it rely on? What could be inaccurate, biased, private, or unclear? Who is accountable for the outcome? Encourage students to compare AI outputs with trusted sources, identify limitations, and explain when human judgment is necessary. The goal is not fear or blind trust, but informed, responsible participation.

CHAPTER 2

Lesson Plan

Lesson Plan: AI Literacy

CHAPTER 3

Grade/Level

Adaptable for secondary, postsecondary, adult learning, and workforce training.

CHAPTER 4

Learning Goals

By the end of the lesson, learners will be able to:

- Define AI literacy.
- Identify common places where AI appears in daily life.
- Explain basic AI-related ideas such as data, algorithms, machine learning, generative AI, and uncertainty.
- Evaluate AI outputs for accuracy, bias, privacy, transparency, accountability, and need for human oversight.
- Describe why AI literacy matters as a civic and workforce skill.

CHAPTER 5

Essential Question

How can we use AI thoughtfully while recognizing its limits and responsibilities?

CHAPTER 6

Materials

- Projector or shared screen
- Example AI output or sample generated response
- Evaluation checklist
- Chart paper or digital collaboration board

CHAPTER 7

Lesson Flow

7.1 1. Warm-Up: Where Do We Meet AI? 10 minutes

Ask learners to list places they think AI may appear: school tools, workplace software, recommendation systems, media feeds,

healthcare tools, or public services. Discuss that AI is increasingly embedded in many systems.

7.2 2. Mini-Lesson: What Is AI Literacy? 15 minutes

Introduce the definition: AI literacy is the knowledge, skills, and dispositions that enable people to understand, evaluate, use, and participate in decisions about AI systems. Explain that it includes practical capability and responsible judgment.

7.3 3. Concept Map: What Should AI-Literate People Know? 15 minutes

Learners build a concept map using these terms: data, algorithms, machine learning, generative AI, uncertainty, automated output, human judgment, bias, privacy, transparency, accountability, and human oversight.

7.4 4. Hands-On Evaluation: Check an AI Output 25 minutes

Provide a sample AI-generated response or decision-support example. Learners evaluate it using questions:

- Is it accurate?
- What evidence or sources would be needed?
- Could bias be present?
- Are there privacy or security concerns?
- Is the process transparent enough?
- Who is accountable?
- Where is human oversight needed?

7.5 5. Discussion: Why This Matters 15 minutes

Connect AI literacy to education, work, healthcare, media, and public services. Discuss how broad AI literacy can support informed participation, safer adoption, and more equitable outcomes.

7.6 6. Exit Ticket 5 minutes

Learners complete: One thing AI can help with, one limitation to remember, and one responsibility users have.

CHAPTER 8

Assessment

- Participation in discussion
- Completed evaluation checklist
- Exit ticket response

CHAPTER 9

Extension

Learners compare two AI outputs on the same prompt and evaluate differences in accuracy, bias, clarity, and need for human review.

CHAPTER 10

Step by Step

- Recognize where AI is being used, such as in education, work, healthcare, media, public services, and everyday digital tools.
- Understand the basic concepts behind AI, including data, algorithms, machine learning, generative AI, and uncertainty.
- Identify what AI systems can do well and where they may be

unreliable or limited.

- Evaluate AI outputs critically by checking accuracy, bias, source quality, and whether the result makes sense in context.
- Consider responsible-use issues such as privacy, security, transparency, accountability, and social impact.
- Use human oversight to decide when to trust, revise, reject, or further investigate an AI-generated result.
- Practice hands-on use while reflecting on both practical effectiveness and ethical consequences.

CHAPTER 11

Kingdom Lion Verification Questions(TM)

- A student says, "AI gave me an answer, so it must be correct." How would you respond in a way that shows genuine AI literacy?
- Explain why AI literacy includes both technical understanding and ethical reasoning. Why is one without the other incomplete?
- An AI system is useful but not transparent about how it produces results. What questions should users or decision-makers ask before trusting it?
- A workplace wants to use AI to help make decisions about employees. What concerns should be considered regarding bias, accountability, privacy, and human oversight?
- Why is AI literacy becoming a civic skill, not only a skill for computer scientists?
- Describe a situation where AI could support safer or more equitable outcomes, and explain what safeguards would still be

needed.

- How can someone critically evaluate AI-generated media before believing or sharing it?
- What is the difference between using AI as a tool for support and allowing AI to replace responsible human judgment?
- If an AI system gives different quality answers to different groups of people, what AI literacy concepts help you analyze the problem?
- Design a responsible process for using AI in an important decision. Include accuracy checks, privacy protection, bias awareness, transparency, accountability, and human oversight.

COLOPHON

AI Literacy - Teacher Guide was set in a classic serif text face chosen for comfortable long-form reading, with display typography in a complementary sans-serif.
