CHAPTERS

Chapter 1

Lesson Plan

Chapter 2

Grade/Level

Chapter 3

Learning Goals

Chapter 4

Essential Question

Chapter 5

Materials

Chapter 6

Lesson Flow

- 6.1 1. Warm-Up: Where Do We Meet AI? 10 minutes
- 6.2 2. Mini-Lesson: What Is AI Literacy? 15 minutes
- 6.3 3. Concept Map: What Should AI-Literate People Know? 15 minutes
- 6.4 4. Hands-On Evaluation: Check an AI Output 25 minutes
- 6.5 5. Discussion: Why This Matters 15 minutes
- 6.6 6. Exit Ticket 5 minutes

Chapter 7

Assessment

Chapter 8

Extension

Chapter 9

Student Notes

Chapter 10

Practice

CHAPTER 1

Lesson Plan

Lesson Plan: AI Literacy

CHAPTER 2

Grade/Level

Adaptable for secondary, postsecondary, adult learning, and workforce training.

CHAPTER 3

Learning Goals

By the end of the lesson, learners will be able to:

- Define AI literacy.
- Identify common places where AI appears in daily life.
- Explain basic AI-related ideas such as data, algorithms, machine learning, generative AI, and uncertainty.
- Evaluate AI outputs for accuracy, bias, privacy, transparency, accountability, and need for human oversight.
- Describe why AI literacy matters as a civic and workforce skill.

CHAPTER 4

Essential Question

How can we use AI thoughtfully while recognizing its limits and responsibilities?

CHAPTER 5

Materials

- Projector or shared screen
- Example AI output or sample generated response
- Evaluation checklist
- Chart paper or digital collaboration board

CHAPTER 6

Lesson Flow

6.1 1. Warm-Up: Where Do We Meet AI? 10 minutes

Ask learners to list places they think AI may appear: school tools, workplace software, recommendation systems, media feeds, healthcare tools, or public services. Discuss that AI is increasingly embedded in many systems.

6.2 2. Mini-Lesson: What Is AI Literacy? 15 minutes

Introduce the definition: AI literacy is the knowledge, skills, and dispositions that enable people to understand, evaluate, use, and participate in decisions about AI systems. Explain that it includes practical capability and responsible judgment.

6.3 3. Concept Map: What Should AI-Literate People Know? 15 minutes

Learners build a concept map using these terms: data, algorithms, machine learning, generative AI, uncertainty, automated output, human judgment, bias, privacy, transparency, accountability, and human oversight.

6.4 4. Hands-On Evaluation: Check an AI Output 25 minutes

Provide a sample AI-generated response or decision-support example. Learners evaluate it using questions:

- Is it accurate?
- What evidence or sources would be needed?
- Could bias be present?
- Are there privacy or security concerns?
- Is the process transparent enough?
- Who is accountable?
- Where is human oversight needed?

6.5 5. Discussion: Why This Matters 15 minutes

Connect AI literacy to education, work, healthcare, media, and public services. Discuss how broad AI literacy can support informed participation, safer adoption, and more equitable outcomes.

6.6 6. Exit Ticket 5 minutes

Learners complete: One thing AI can help with, one limitation to remember, and one responsibility users have.

CHAPTER 7

Assessment

- Participation in discussion
- Completed evaluation checklist
- Exit ticket response

CHAPTER 8

Extension

Learners compare two AI outputs on the same prompt and evaluate differences in accuracy, bias, clarity, and need for human review.

CHAPTER 9

Student Notes

AI literacy means understanding what AI can do, what it cannot reliably do, and how to use it responsibly. AI can help generate ideas, summarize information, recognize patterns, and support problem-solving, but it does not automatically know what is true or fair. You still need to think critically. Check facts, look for bias, protect private information, and remember that human judgment matters. A strong AI user does not simply accept an output—they question it, test it, improve it, and decide when it should or should not be used.

CHAPTER 10

Practice

- Choose one AI-generated answer and verify its claims using reliable sources before accepting it.
- Look at an AI tool you already use and identify what data it may use, what task it automates, and where human judgment is still needed.
- Discuss a real-world AI use, such as hiring tools or medical decision support, and list possible benefits, bias risks, privacy concerns, and accountability questions.

COLOPHON

AI Literacy - Lesson Plan was set in a classic serif text face chosen for comfortable long-form reading, with display typography in a complementary sans-serif.
